

PRODUCTS FOR  
**HOBBY FARMING**

## Who are we?

**Ormi Group** and **Novital**, two of the strongest companies in the poultry products sector in Spain and Italy, join forces with the goal of providing the best service and offering the widest product portfolio on the Hobby Farming market.

With this merger the **ORMITAL** brand is created, becoming the leading manufacturer of accessories for Hobby Farming, with three factories in Spain and Italy.

Among our range of products of own manufacture, we highlight:

- Incubators
- Feed mills
- Plastic accessories
- Metal accessories
- Poultry houses
- And a new line of poultry housing made from 100% recycled materials.

## Our vision?

Create a more sustainable world with our product and service offer. We want to contribute to the bond between people, nature and farm animals, so that together can develop values more beneficial for future generations.

## Our mission?

To be the reference in the European manufacturing sector of Hobby Farming products, contributing to sustainability and to the environment.

## Our Values?

Our main value is the manufacture of sustainable and environmentally friendly products.

Our hallmark, is a 100% European manufactured products with the highest quality, prioritizing the optimization of animal's life quality.

We are continuously researching and investing in the optimization of our products with the most innovative technology.

KEY:

	Number of parts included in the package
	Package dimensions (length x depth x height)
	Number of pieces contained in pallets 80x120 cm
	Double packaging for maximum transport safety
	Information box / label
	Single piece weight
	Barcode
	Bio: Products recommended for free-range production farms, complying with animal welfare regulations.
	Top sales: Best selling products in our main categories.
	New: New products launched in the market.

# ATTESTATION OF CONFORMITY

## TO THE ELECTROMAGNETIC COMPATIBILITY DIRECTIVE 2014/30/EU

Attestation number : 3504706.04\_EMC

Issued to : Novital S.r.l.  
Via Europa, 7  
21015, Lonate Pozzolo (VA) - Italy

Manufacturer : Novital S.r.l.  
Via Europa, 7  
21015, Lonate Pozzolo (VA) - Italy

Product Type : Electric mill

Model reference : GOLIA - 4 V

Serial number : ---

Testing laboratory : ELETECH s.r.l. - 23871 Via Garcia Lorca 29, Lomagna (LC) - Italy

Test Report ref. No. : 000523EMC00\_00

Requirements : EN 55014-1:2006 +A1:2009 +A2:2011; EN 55014-2: 2015;  
EN 61000-3-3:2014; EN 61000-3-3:2013

I, the undersigned, declare that the product described above is in conformity with the above technical specification.  
This certificate of conformity is issued on the basis of the test results indicated in the test report mentioned  
by ELETECH S.r.l. The investigation does not include an assessment of the manufacturer's production.

Date of issue : 2016-06-01

## Digital Thermometer

**Material:** Plastic.

**Features:** Display 27x16h mm, resolution 0.1 °C, tolerance +/- 0.2 °C in the range between 35 °C and 40°C, °F/°C selection, powered with alkaline batteries (not included) AAA LR03 1.5 Volt.

**2 Settings:**

- Covatutto mode (quick selection of the specific model of ORMITAL incubator, automatic setting of the reference parameters).
- Ambient mode (the ideal solution to measure the ambient temperature and any other type of incubator), auto-off after 5 min. from the activation.

**Dimensions:** 70x27x155h mm

**Compatible with:** Covatutto Analogue 24Eco-24-54-180-162, Covatutto 7 with three bulbs (latest version) and Covatutto 16L Analogue.

## Thermometer with Hygrometer - Digital

**Material:** Plastic.

**Features:** Display 27x16h mm, resolution 0.1 °C, tolerance +/- 0.2°C in the range between 35 °C and 40°C, Relative Humidity +/- 2%, °F/°C selection, powered with alkaline batteries (not included) AAA LR03 1.5 Volt.

**2 Settings:**

- Covatutto mode (quick selection of the specific model of ORMITAL incubator, automatic setting of the reference parameters).
- Ambient mode (the ideal solution to measure the ambient temperature and humidity with any other type of incubator), auto-off after 5 min. from the activation.

**Dimensions:** 70 x 27x 160h mm

**Compatible with:** Digital and Analogic 24Eco-24-54-180-162, Covatutto 7 with 3 lights (last version) and Covatutto 16L Analogic and Covatutto 16L Digital PRO.

### EGG CANDLING FOR MONITORING THE EMBRYONIC DEVELOPMENT STAGES

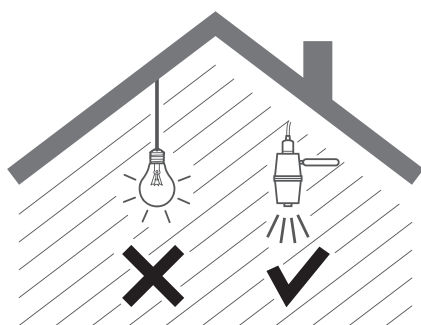

The fertilized egg contains the developing embryo. Initially, a dense capillary network just below the shell can be observed. The embryo appears as a dark spot which becomes larger as incubation progresses. After a certain time only a dark mass that becomes larger and larger and the air chamber are visible.

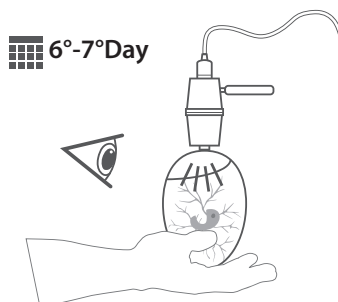

The egg candeling is performed by illuminating the egg with an intense light from the bottom.

The egg candeling is performed by illuminating the egg from the bottom to the top, which should be facing downwards.

The egg candeling must be carried out in a dark place, where the flashlight is the only source of light.

From the 6th or 7th day on, you can check the embryo's status to eliminate unfertilized eggs. This operation is not essential.

You can repeat the operation between days 10 to 17 days of incubation (no later) to verify the correct development of the embryo.

## Brooder CALDO CIP

**Heating:** Light bulb 75W E27 (supplied in the standard equipment).

**Temperature:** Manually adjustable.

**Materials:** Non-toxic plastic.

**Features:** Access door, rotating basket, transparent dome and removable dropping tray.

**Ideal solution for the first days of life of chicks, birds, cats and dogs.**

The innovative drainage system was designed to prevent stagnation and to speed up the cleaning operations without using any tools to remove the water sealing components, which can fall out, get dirty or even get lost.

With two simple operations: Lift the pin (detail in the picture) and turn to directly adjust the opening of the drain valve, which allows quick drainage of dirty water.

## RIVERA Linear feeder

**Material:** Available in two finishes, one made of galvanized sheet metal and the other in stainless steel\* (MOQ upon request).

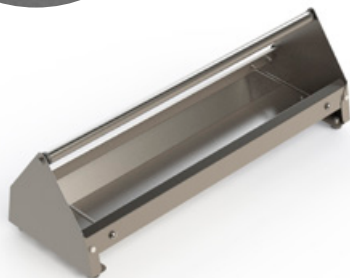

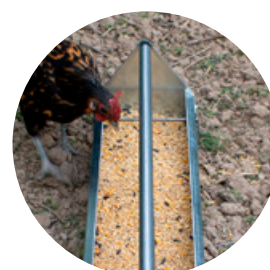

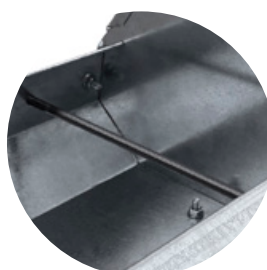

**Measurements:** 60 cm and 120 cm.

**Characteristics:** It has an upper bar of 20 mm in diameter that turns on its own axis so that the birds cannot perch, at the same time it serves as a handle for transport. It includes plastic heel pads to prevent the metal from coming into contact with the ground, thus preventing it from rusting (conventional model).

The feeder channel has no corners so it is very easy to clean.

It also has two rods on the sides to prevent the animals from taking out the feed from the side. It is delivered disassembled and in a cardboard box.

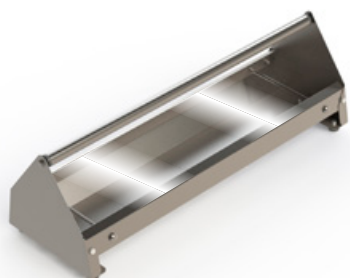

Conceived and designed to take advantage of the organic leftovers of the food at home for your hens, promoting the circular economy.

# Hopper feeder PREMIER

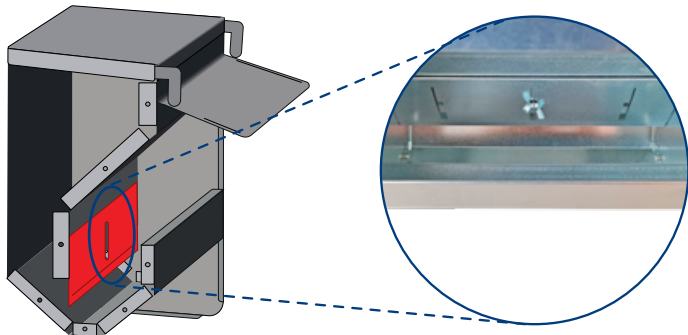

**Material:** 100% galvanized structure.

**Characteristics:** The PREMIER hopper is a feeder designed to be installed in any type of poultry house, both indoors and outdoors thanks to its reversible hooks, and thanks to its two rear holes it can be fixed to a wall or wooden panel.

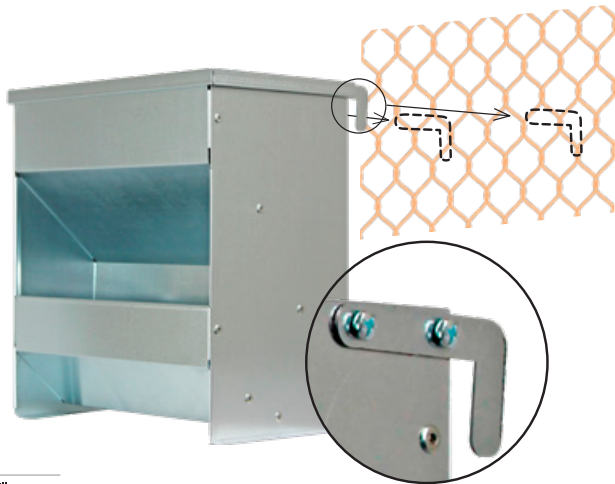

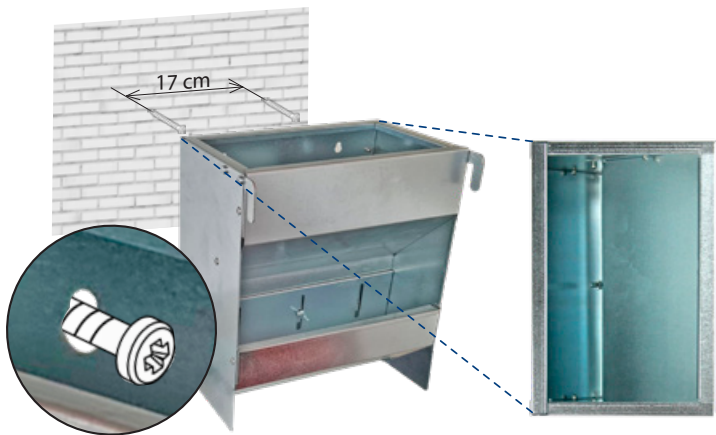

This hopper has a feed regulator inside the pan.

It can be served with a visor to protect when installed outdoors.

\* Pieces in American pallets 100x120 cm

## Linear Grandpa's feeder

**Material:** Galvanized sheet metal structure.

**Characteristics:** It is a linear hopper with 3 weight regulations: 550 g, 750 g and 1300 g, which will activate the opening of the lid in order to allow the hen access to the feed. It prevents rodents and birds from accessing the feed, eating it and contaminating it with their feces. It also incorporates a removable visor to prevent rain from soaking the feed. This fits over the top of the hopper and the side flaps, thus side flaps, making it 100% waterproof.

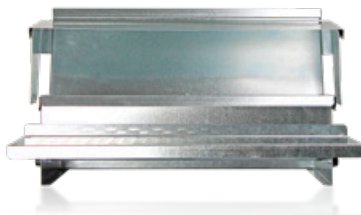

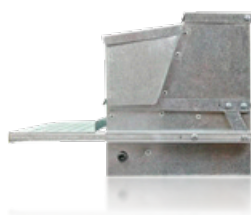

**Capacity:** 20 L

This hopper also incorporates an anti-waste system and a feed level regulator, so that the user can increase or decrease the quantity and type of feed pellet according to the species.

It also incorporates a noise cancellation system, when opening or closing the hatch, this prevents the hens from being frightened and not eating in the feeder. It is undoubtedly a system that improves animal welfare.

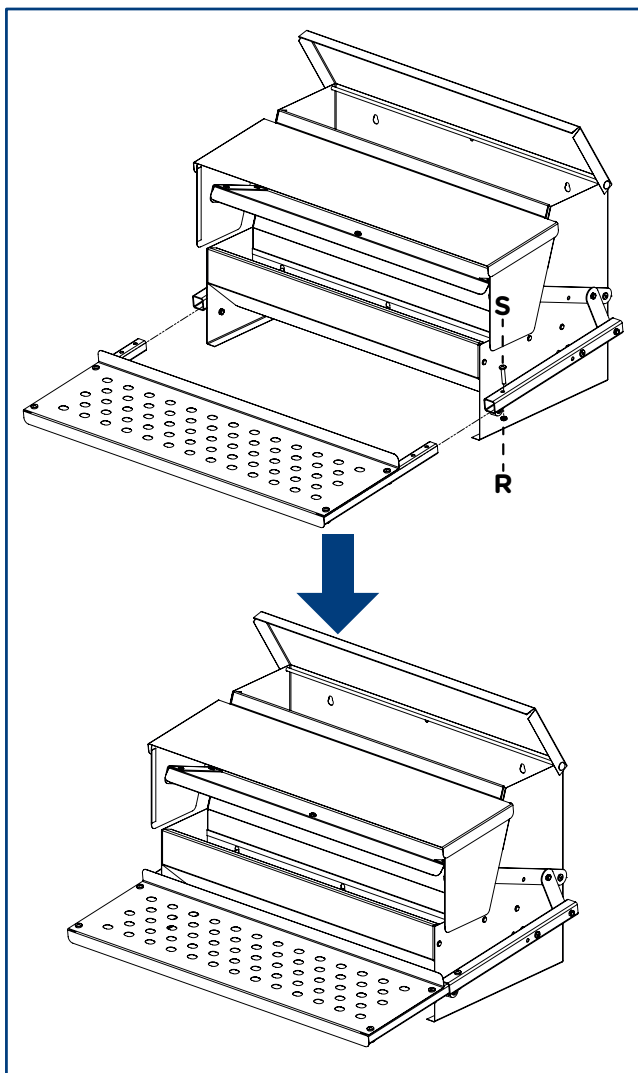

Article		 l x p x h	 Kg		 Code

# Linear Grandpa's feeder Instructions

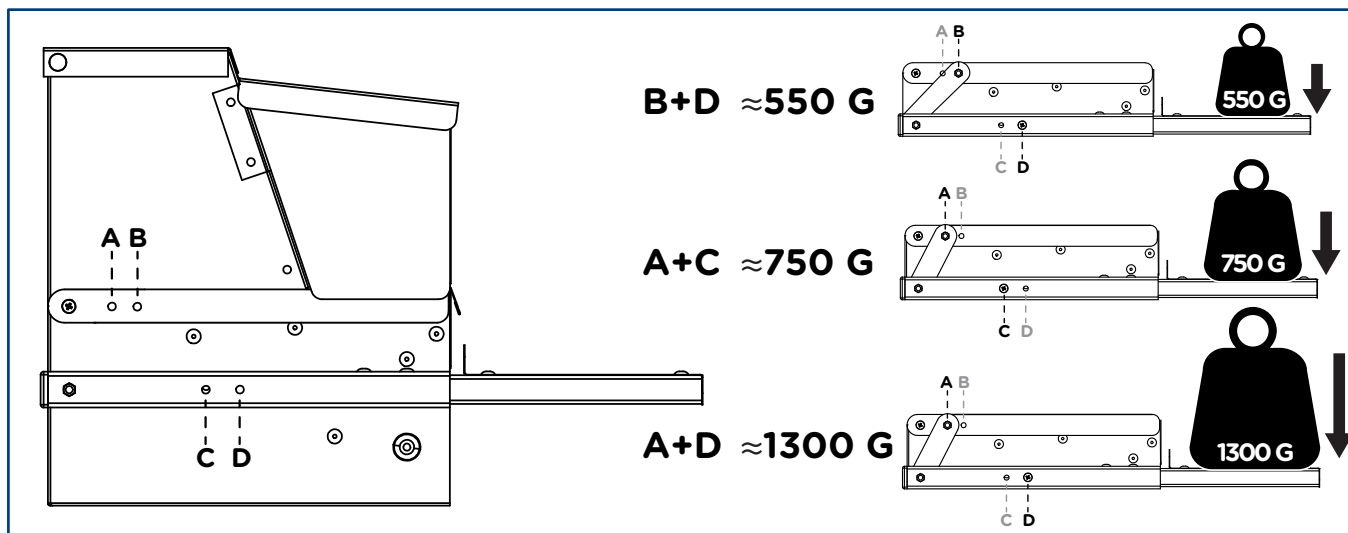

Foot pedal adjustment and insertion

Manual adjustment for weight regulation

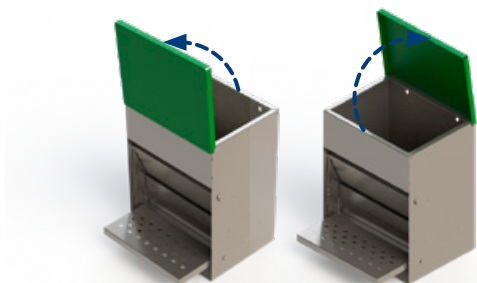

Three weight support settings

## JERRY mechanical opening hopper

- ① The pedal, suitable for all kinds of poultry such as hens, pheasants and ducks, has just the right size for the animals to climb up without soiling it.

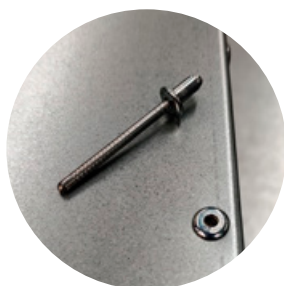

- ② The top lid can be opened from the front or the back to fill the feed.

The hopper includes two holes for hanging it to the wall.

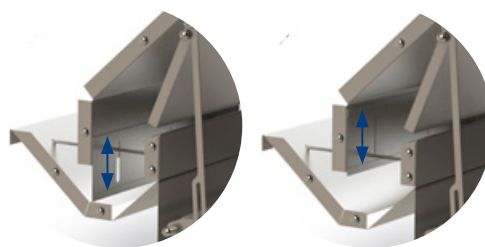

- ③ The dock has three adjustments in the 18 and 29 L models and nine in the 64 L model. The lowest setting is activated from approx. 650 g, considering that a rat can weigh between 80 and 250 grams, there is enough margin to withstand the weight of several rats at the lowest setting.

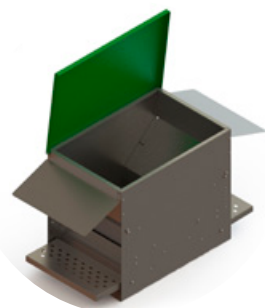

- ④ The rivets that we use for their manufacture are made of aeronautical steel and are set by an automatic machine that rivets at exactly the same pressure, guaranteeing the highest quality at the joints.

- ⑤ All models of the JERRY mechanical opening hoppers are equipped with a mechanical feed drop regulation system which makes it very versatile when introducing any type of grain or feed, perfectly controlling the height of the feed in the feeder.

- ⑥ The 64L hopper has two feeders, one on each side, so that a larger number of birds can fit in.

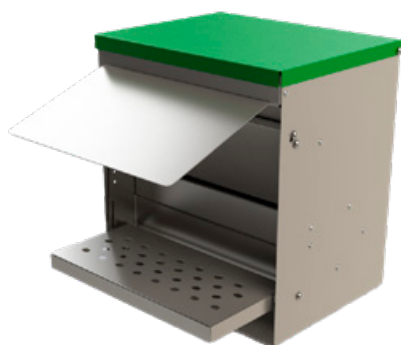

- ⑦ The 64 L hopper is specially designed for outdoor use, which is why it has two visors, one on each side to prevent water from disturbing the hens during feeding. These visors are easily removable and screws are not required.

- ⑧ It has two springs to regulate the weight of the mechanism, with nine types of possible settings.

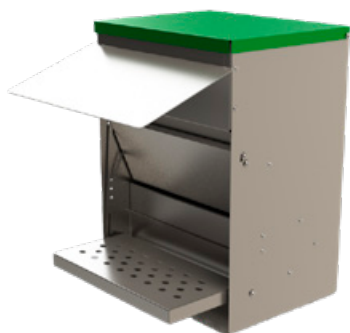

## JERRY mechanical opening hopper

## Large capacity outdoor hopper

1

We have two versions, one of 250L and the other of 500L. Both hoppers have a hinged lid and entrances to the feeder on both sides, including the visor, to prevent water from entering

2

As an option, we offer the possibility of adding skids, thus facilitating mobility with the tractor.

3

The lid is hinged and gives the possibility to open to both sides, according to the needs.

4

It has a side window that indicates the level of the hopper at 30% of its capacity.

5

It has gates to close the access of birds to the hopper.

F0299076					8436597092432

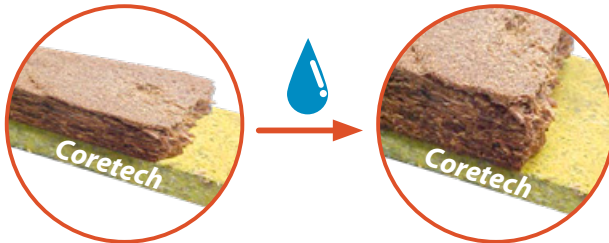

## CORETECH

Coretech is a high-performance technical board with which we manufacture our chicken coops due to its high quality standards, with an outstanding performance against humidity and excellent acoustic absorption/insulation characteristics, compared to other materials.

1

### Board composition:

- Semi-rigid polyurethane foam.
- Long fiberglass.
- Paper or cellulosic fabric.
- Fabric.
- Thermosetting resins

*Coretech does not swell or deform.*

2

### Dimensional stability; water resistance in EXTREME ENVIRONMENT (AUTOCLAVE)

**Test:** 16 hours at 134°C and 100% humidity. Comparison of Coretech vs. chipboard. Equal initial thicknesses.

**Result:** In an environment of extreme humidity and temperature, Coretech does not swell or deform, while normal chipboard swells to the point of almost total loss of cohesion.

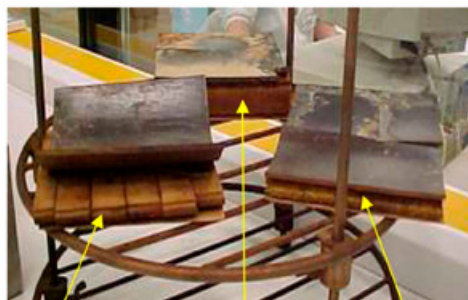

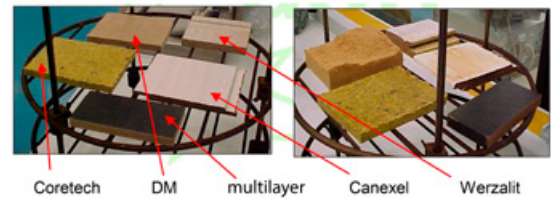

3

### Dimensional stability; water resistance in EXTREME ENVIRONMENT (AUTOCLAVE)

**Test:** 3 hours at 134°C and 100% humidity.

**Panel performance comparison:** Coretech - Multilayer - Werzalit - Canexel - DM.

**Result (% swelling):** Coretech 1,94 - multilayer 8,52 - Werzalit 21,05 - Canexel 35,5 - DM 103,17

Wood core decking      Hydrophobic MDF core decking      Coretech

4

### Dimensional stability; water resistance in EXTREME ENVIRONMENT (AUTOCLAVE)

**Test:** 16 hours at 134°C and 100% humidity.

Performance comparison Coretech decking vs. water-repellent MDF core decking vs. solid wood core decking. Equal initial thicknesses.

**Result:** Due to the aggressiveness of the test, the wood sheathing deforms in all cases. On the other hand, the wood and Coretech cores remain intact, but not the water-repellent MDF core, which loses cohesion.

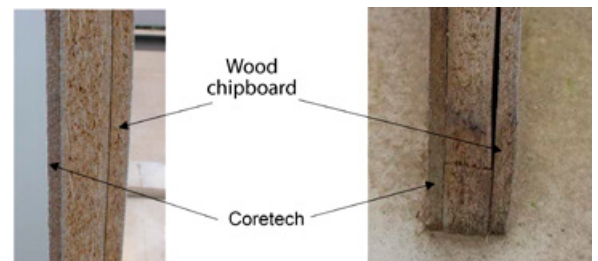

5

### Dimensional stability; Outdoor behavior

**Test:** Six months outdoors.

Comparison between Coretech board and Chipboard of equal initial thickness.

**Result:** After six months outdoors, while coretech does not swell, the regular chipboard deforms significantly, especially at its base.

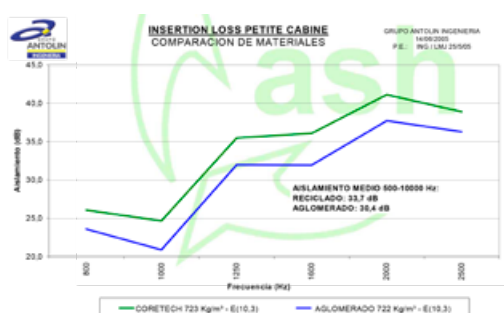

6

### Acoustic insulation in "Petit Cabine".

**Test:** Comparison of acoustic insulation between Coretech and wooden chipboard of equal thickness and density (human ear frequency range).

**Result:** Coretech insulates 3.3 dB more than a chipboard with the same characteristics.

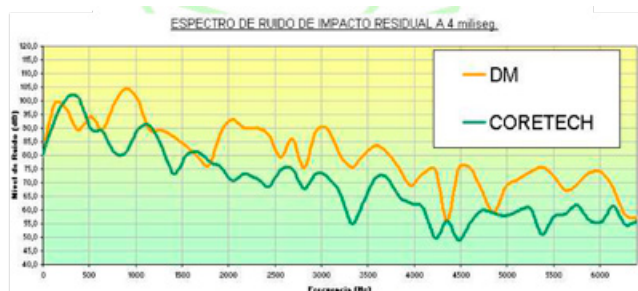

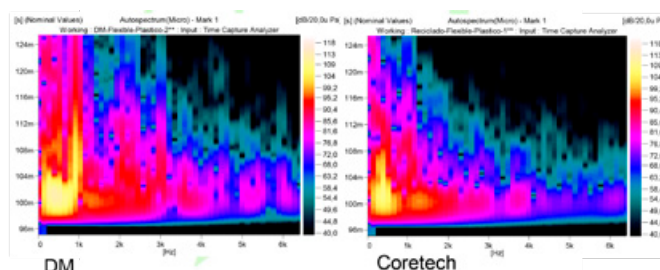

7

### Impact noise level absorption

**Test:** Throwing of impactor (plastic and metallic) in anechoic chamber.

Comparative impact noise level absorption at different frequencies. Boards tested: Coretech - chipboard - DM.

**Result:** Coretech absorbs more noise than the other materials tested, especially at high frequencies.

8

### Impact noise level absorption

Same test as the previous one at  $t = 4$  milliseconds after impact.

The graphic clearly shows that Coretech absorbs more impact noise level than DM.

9

### Thermal insulation

**Test:** Thermal resistance (insulation) carried out at Aitex according to, ISO 11092:1993/UNE-EN 31092:1996 standards.

Comparison Coretech board vs. wooden chipboard.

**Result:** Coretech thermally insulates 1,71 times more than chipboard with similar characteristics.

Material	Width (mm.)	Thermal resistance Rct ( $m^2 \cdot K/W$ )	Thermal conductance (W/mK)
Coretech	11	0,1122	0,0980
Wood chipboard	10	0,0655	0,1545

Material	Stiffness	Strength
Wood chipboard	168.15	298.63
Coretech	127.59	669

10

### Stiffness

**Test:** Stiffness (according to SAE J 949 mod. GM automobile standard). Comparison Coretech board vs. wooden chipboard.

**Result:** Wooden chipboard 168,15(Stiffness) 298,63 (Strength)  
Coretech 127,59(Stiffness) 669(Strength).

11

### Affinity (adhesives and finishes)

Coretech shows great affinity to all types of glues, especially polyurethane.

It also accepts multiple finishes for both interior and exterior (smooth paint, artex, stucco...).

## FINAL EVALUATION

Outstanding features of the Coretech technical board:

1. Excellent water resistance, dimensional stability.
2. Very good acoustic performance (absorption and insulation of noise level).
3. Good fire properties (level C).
4. Excellent thermal insulation.
5. Passes the screw start test.
6. Suitable for all kinds of glues, especially PU glues.
7. It admits multiple finishes.
8. It is not attacked by insects.
9. Actively contributes to sustainable development.

# FENIX LAYING NEST

DESIGNED BY FARMERS, MANUFACTURED BY ENGINEERS.

## 01.

It can be placed on the floor or hung on the wall. The sides act as legs, which are fixed to the tray, forming a single block.

## 02.

The tray is one-piece made, which makes it one of the strongest laying nest on the market.

The tray and the base of the tank have perforations sift out dust and dirt. The tank's base is also removable for even easier cleaning.

## 03.

It has ventilation on all sides and separators to avoid condensation inside, preventing problems for the hens and rust.

## 04.

Hinged opening towards the outside, making egg collection much easier and cleaner because any dirt on top of the lid does not fall down into the tank, as is the case with most systems on the market.

## 05.

This perch can be folded down, making it a barrier to prevent hens from coming in to roost at night.

## 06.

The hooks of the laying nest, perch and tube are 1.2 - 1.5 mm thick to further ensure the strength and durability of the nest

01

02

03

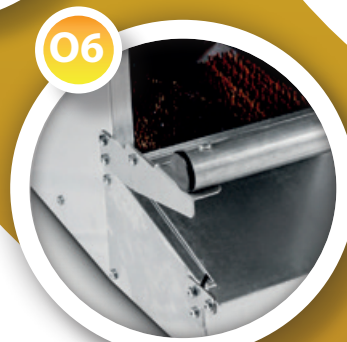

04

05

06

07

07.

It has a 35mm diameter perch, perfect for the hens' feet. The tube is 1,5mm thick, giving it incredible strength.

08

08.

Possibility to place the egg deposit outside or inside the chicken coop. So we provide an incredible added value.

09

09.

The separators do not go all the way down, so the egg will never get stuck on the walls.

10

10.

The Fénix laying nest includes Astroturf mats to keep the nest box cleaner and improves the welfare of the hens.

11

11.

It also keeps the egg cleaner as it rolls into the deposit.

12

12.

We have a digital packaging to make full color designs that will not go unnoticed.

## LAYING NEST FENIX

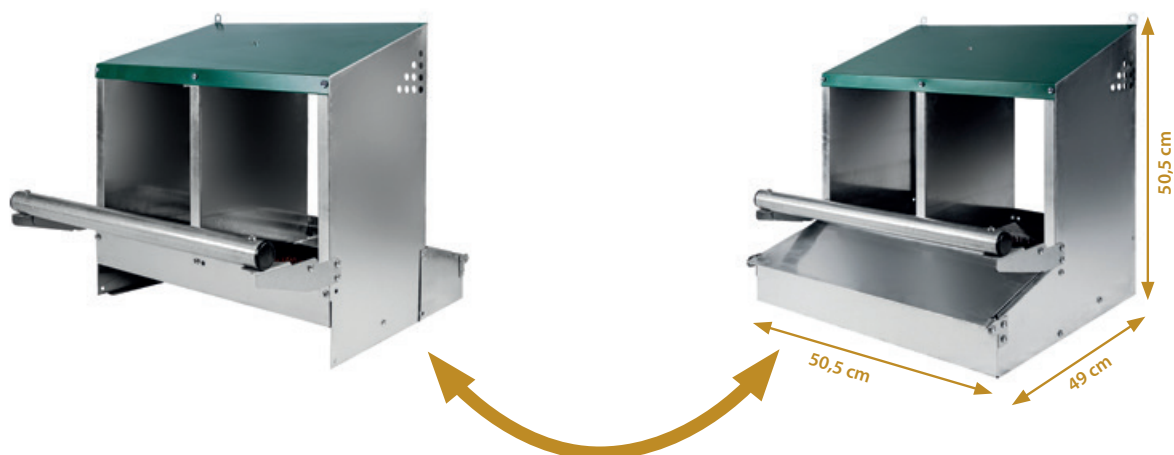

**Material:** 100% galvanized sheet metal.

**Features:** Exclusive design that allows the tank to be placed outside or inside the coop, which provides incredible versatility without spending more on accessories or additional pieces.

**Capacity:** 2, 3, 4 Departments.

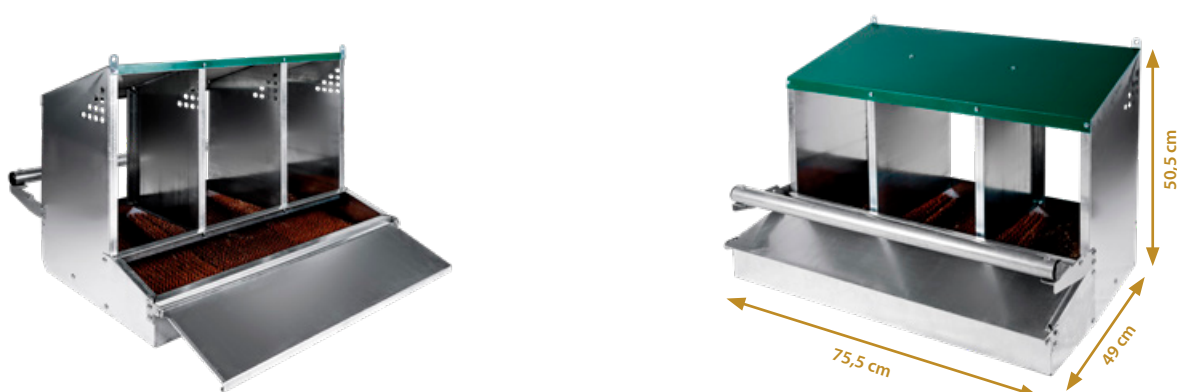

*The Astroturf mat is included.*

### 2 Departments

## LAYING NEST BENNU

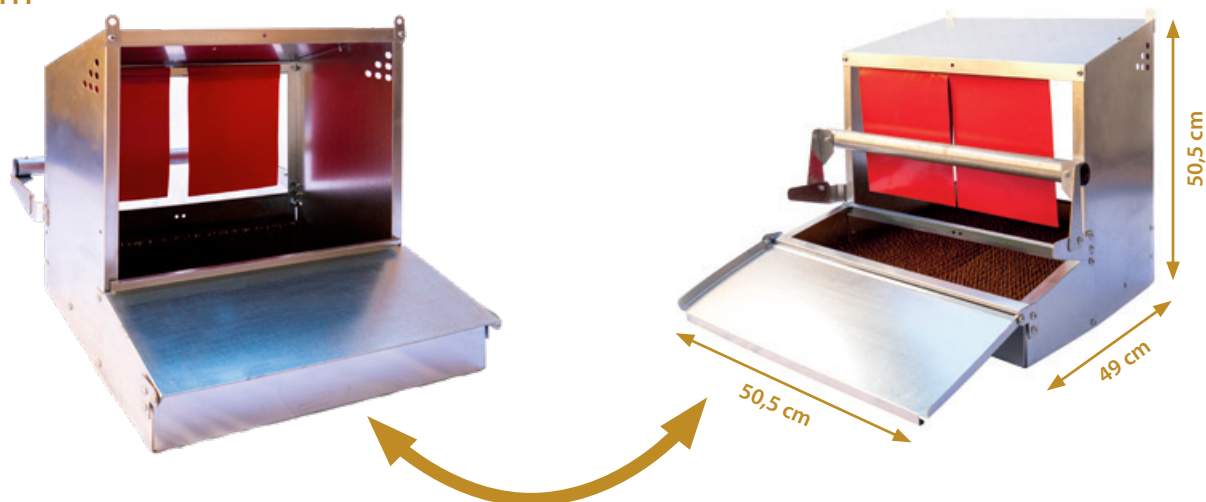

**Material:** 100% galvanized sheet metal.

**Features:** It has the same technical characteristics and measurements as its brother Fenix, but with an open interior space (without separations), which allows greater comfort for the collective laying.

**Capacity:** 2, 3, 4 Departments.

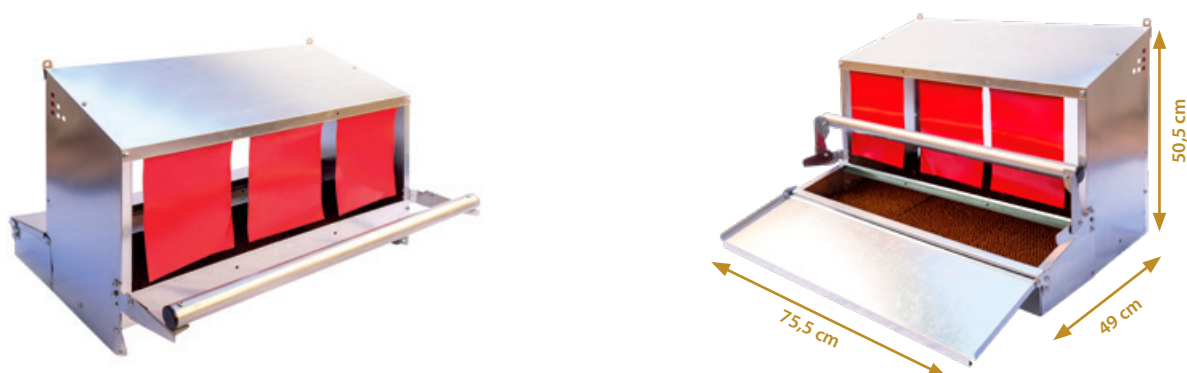

*The Astroturf mat is included.*

## FENIX AND BENNU LAYING NESTS WITH LEGS

**Material:** 100% galvanized sheet metal.

**Characteristics:** Its design allows coupling the structures forming a single piece that helps to gain space and versatility.

**Capacity:** 2, 3, 4 Departments of one or two floors.

*The Astroturf mat is included.*

## MAT ASTROTURF

With the FENIX and BENNU nappy lines, we include the Astroturf mat as a gift.

The Astroturf mat keeps the nappy cleaner and improves the well-being of the hens' feet. Thanks to this mat, the egg is automatically cleaned when it rolls into the tank.

## FENIX NEST

**Material:** 100% galvanized sheet metal.

**Features:** Each department has the right size for the hen to incubate the eggs and feel protected. It includes a 35 mm diameter perch, perfect for the hens' feet. The one-piece tray, with perforations for easy cleaning, makes this nest the most resistant on the market. It has ventilation on the sides to avoid condensation. It can be hung or placed on the floor.

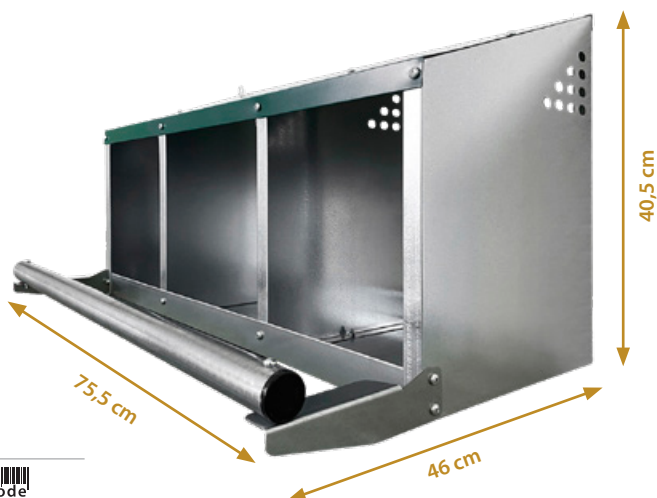

**Capacity:** 2, 3, 4 Departments.

# ORGANIC POULTRY

# ORMITAL

## Mobile Farmyard

**Features:** The mobile farmyard is a product designed for BIO and free-range poultry producers. The internal structure is reinforced with welded braces and subsequently hot-dipped galvanized for added strength and durability. The structure is supplied semi-disassembled and assembly is done with screws, making it easier to assemble. Our universal displacement kit fits all mobile farmyards, saving the farmer money by not requiring different displacement kits for each model.

It complies with technical and legal requirements based on European Conformity (CE), applicable for mobile structures with two heights as long as the ground does not have a slope greater than 2-3 degrees of incline.

**Material:** It consists of a 100% hot-dip galvanized structure covered with a 35mm thick sandwich panel.

**Length:** 6x6 m, 12x6 m and 18x6 m.

**Maximum speed of assembled farmyard displacement:** 4 Km/h.

It complies with ISO 9001 quality certification.

### Transition Area SAS 1

## Transition Area SAS 2

#### DESCRIPTION:

ORMI-THERMAL is a water dispersion coating, containing spherical, non-porous and hollow with exceptional strength and clarity glass particles. Once the solution dries, it creates a highly reflective, waterproof membrane with a high SRI (Solar Reflectance Index).

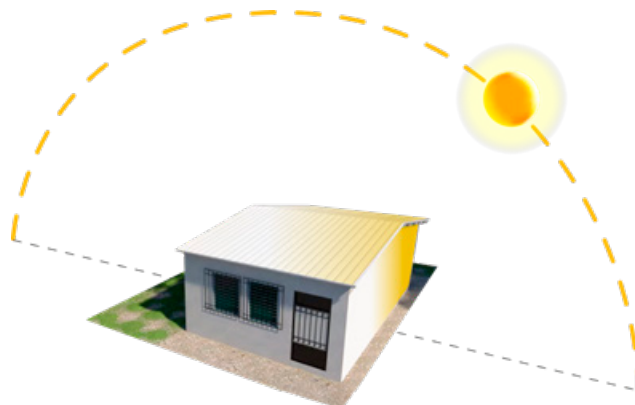

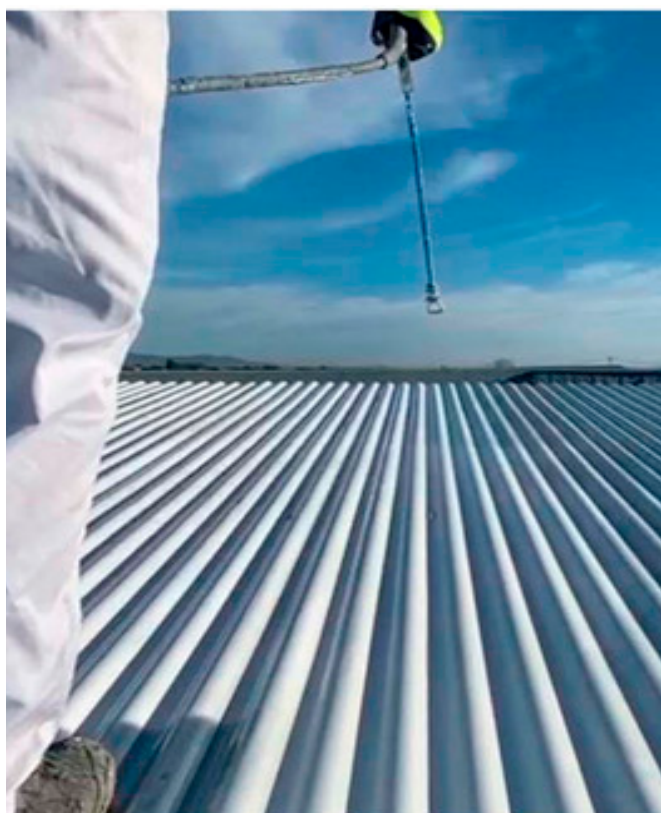

#### APPLICATION FIELD:

Roofs and terraces made of mortar, metal sheet, tiles, fiber cement, etc. Homes, commercial buildings, warehouses, livestock buildings for sheep, pigs, or cattle, caravans, temporary site offices for electrical and electronic equipment, electrical cabinets, and any other place where you want to quickly and economically reduce the interior temperature by eliminating roof or ceiling heating.

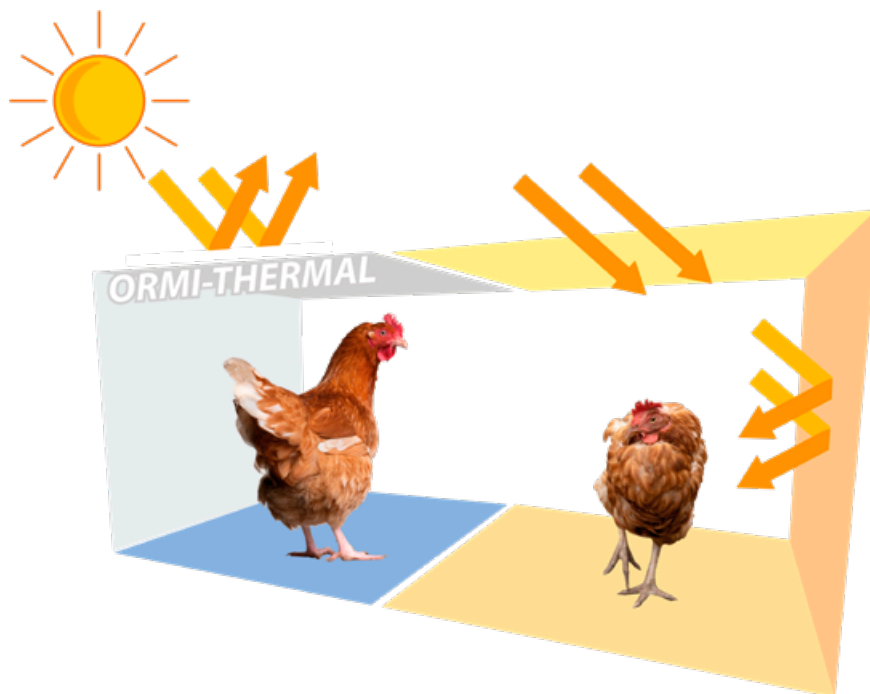

#### BENEFITS:

1. Reduces the temperature of roofs and ceilings by 15 to 22 °C.
2. Reduces energy expenses.
3. The application is easy, either using a brush, roller, or a spray gun.
4. ORMI-THERMAL has waterproofing properties on the surface where it is applied.
5. Reduces thermal stress on materials, extending their useful life.
6. By reducing the thermal temperature inside the building, it increases comfort and improves productivity in both the agricultural and industrial sectors.
7. Prevents internal overheating in electrical and electronic equipment inside cabinets and buildings.
8. When applied, it does not emit any odors or chemicals that could be harmful to health.

#### ANIMAL WELFARE:

Committed to animal welfare, we know that maintaining an adequate temperature in the spaces where they live is essential for their health and well-being. ORMI-THERMAL helps to maintain a comfortable temperature and reduce thermal stress in your animals.

#### CHARACTERISTICS:

Nature	Aqueous dispersion
Cleaning solvent and thinner	Water
Application	Brush, roller or Spray gun
Application temperature	Between 10°C to 35°C
Surface drying time (EN ISO 1517)	1 hour
Recommended consumption	One liter per 1.5 to 1.7 square meters.
Water vapour permeability (EN ISO 7783-1/-2) (Equivalent air barrier)	$S_d < 5$ metres Class I (EN 1504-2) Water vapour permeable
Water permeability (EN 1062-3)	$< 0,1 \text{ kg/ m}^2 \cdot \text{h}^{0,5}$ Waterproof (EN 1504-2)
Adhesion to concrete bases (EN 1542)	$> 0.8 \text{ MPa}$
Hazardous substances (EN 1504-2)	In line with point 5.3 of the EN 1504-2
Hollow spheres conductivity	$0,07 \text{ W/m K}$
Colour	White
SRI index (ASTM E 1980-01) low convection rate (0-2 m/s)	107, 6
SRI index (ASTM E 1980-01) average convection rate (2-6m/s)	108
SRI Index (ASTM E 1980-01) high convection rate (6-10 m/s)	108

#### **SURFACE PREPARATION:**

The surface must be clean, dry, and free from contaminants such as dust, adhered particles, grease, or oil. On cementitious substrates, the surface slurry must be removed by mechanical sanding with wire brushes, rotary brushes, etc.

For improved adhesion and enhanced anticorrosive qualities, it is recommended to apply anticorrosive primers on bare steel metallic substrates. Prior to application, ensure that any remaining rust has been thoroughly removed through deep brushing

If the surface is affected by algae, fungi or mold, it should first be cleaned using a chlorine-based alkaline cleaner that is suitable for all surface types. After cleaning, rinse the surface thoroughly and allow it to air dry.

For the coating to adhere well to cementitious substrates, the surface must be sufficiently rough and porous.

#### **INSTRUCTIONS FOR USE:**

For cementitious surfaces, it is recommended to apply a layer of primer or a first coat thinned with 10-15% water to allow the coating to penetrate into the substrate.

For any other type of substrate, such as primed metal sheet, etc., a clean application of the product with at least two or three coats is required.

To achieve a reflective effect, it is recommended to use 0.35 to 0.70 liters per square meter.

To obtain excellent waterproofing and help insulate the surface, it is recommended to apply one liter per 1.5 to 1.7 square meters.

#### **PRESENTATION AND STORAGE:**

ORMI-THERMAL is available in plastic containers of 5, 10, and 20 liters.

The product should be stored in a cool place, free from frost and extreme heat.

The product can be stored for at least one year if kept in its original containers, tightly closed, and maintained between 5 and 25 °C.

ORMI-THERMAL is manufactured in accordance with ISO 9001:2015 and ISO 14001:2015 standards.

#### **SPECIAL RECOMMENDATIONS:**

- Avoid application when the relative humidity is over 80% and the temperature is below 10°C.
- If rain is expected before the product has dried, avoid applying it outdoors (for at least 6 to 8 hours).

# MILLS

The logo features a stylized white bird silhouette within a circular frame, set against a dark blue background.

# ORNITHO

## THOR grain shredder

**Material:** Painted galvanized steel.

**Induction motor:** 1,5 Hp.

**Hourly production:** Min 50 Kg - Max 80 Kg.

May vary according to the nature and moisture content of the product.

**Motor safety:** Thermal device with manual reset.

**Roller access safety:** Patented safety device.

**Cereal flow regulation:** Manual regulation gate. Grinds all cereals (oats, barley, wheat, corn, beans, etc.) keeping their nutritional value intact.

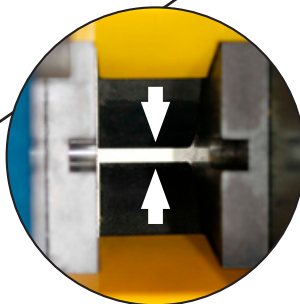

*This machine can break the membrane of the seed so that the animal can digest and assimilate the nutrients better, it is also silent and does not make dust...*

### GEARED MOTOR

The adjustment system allows to obtain an excellent quality shredded product from very fine to traditional sizes.

A powerful GEARED MOTOR drives the steel rollers, suitably machined and heat-treated, mounted on bearings.

The steel rollers are protected by a magnet that retains any metallic objects that may be in the product to be shredded.

**Materials:** Stainless steel.

**Features:**

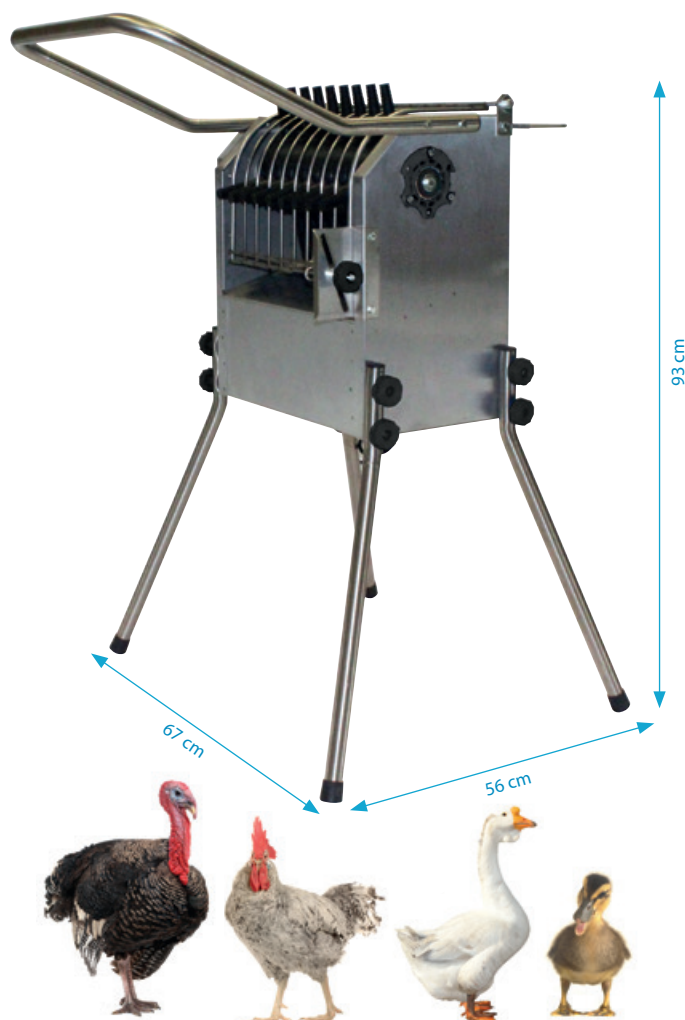

- 36 fingers made with thermoplastic rubber.
- 9 pairs of discs.
- Feather cover.
- Safety grid made with stainless steel that can be adjusted according to the animal to be plucked.
- Adjustable roll-over control bar.
- Trolley to collect the feathers, equipped with rotating wheels and supplied in the standard equipment.
- Anti-vibration feet.
- Asynchronous single-phase motor 230 V - 900 W - 50Hz
- Motor equipped with thermal switch having a manual resetting system.
- Safety push-button.

**Approximate hourly production:** 80/120 chickens.

**Ideal solution for medium and large size poultry and the like (e.g. chickens, ducks, turkeys...)**

# SMALL MAMMALS

# ORMITAL

## Breeder with external nest

**Material:** Electro-galvanised metal net (cages) + plastic (nests, feeders, perch, dropping trays) + steel (drinkers).

**Features:** Sturdy cage made with electro-galvanised 2.5mm net, equipped with two external plastic nests, two feeders, two drip drinkers (to be connected to a gravity water system), a removable plastic perch, three removable trays to collect the droppings.

The pens are internally divided, the central part includes the space that is dedicated to the hay supply, while on the sides the access to the nests can be managed by means of a foldable door.

In the upper part of the cage there is a spring hook to open and close the door of every pen.

The cages can be placed on top of each other and are raised from the floor.

Ideal solution to breed rabbits.

It is supplied disassembled in a box.

**Cage dimensions:** 178 x 51,5 (60) x 87,5 cm

Article		 l x p x h	 Kg	 Code

## Fattening cage

**Material:** Electro-galvanised metal net (cages) + plastic (feeders, perch, dropping trays) + steel (drinkers).

**Features:** Sturdy cages made with electro-galvanised 2.5mm net, raised from the floor.

The cage that is dedicated to fattening is equipped with 3 pens, 3 feeders, 3 drip drinkers

(to be connected to the gravity water main), a removable plastic perch, and 3 trays to collect the droppings.

The space of every pen (fattening) has an extra-large size compared to the standard model, allowing hosting 2 or 3 rabbits per pen during the first 2 or 3 months of life, thus streamlining the relevant space.

The space of every pen is internally delimited and can be adjusted according to the specific needs; the cage is fully accessible from the top and individually from the front by means of the dedicated doors in every pen.

**Ideal solution to breed rabbits.**

**It is supplied disassembled in a box.**

**Cage dimensions:** 122,5 x 51,5 (60) x 87,5 cm

## Breeder with internal nest + fattening cage "composition example"

**Material:** Electro-galvanised metal net (cages) + plastic (nests, feeders, perches and dropping trays) + steel (drinkers)  
**Features:** sturdy cages made with electro-galvanised 2.5mm net, raised from the floor, formed by two levels, the breeder is on the first level, while the fattening cages are on the second level.

The lower part is dedicated to the breeders, equipped with two pens and two external plastic nests, while the upper part includes the fattening cage with three available pens with single and/or total access; overall, it is formed by five feeders, five drip drinkers (to be connected to a gravity water system), two removable perches, six trays to collect the droppings.

The pens (breeder) are internally divided, the central part is dedicated to the hay supply; the space of every pen (fattening) has an extra-large size compared to the standard model, allowing hosting 2 or 3 rabbits per pen during the first 2 or 3 months of life; in addition, it is internally delimited and can be adjusted according to the specific needs.

The cage is fully accessible from the top and individually from the front through individual doors. Ideal solution to breed rabbits.

It is supplied disassembled in a box.

**Cage dimensions/each:** 122,5 x 51,5 (60) x 172 cm

## Double fattening cage "composition example"

**Material:** Electro-galvanised metal net (cages) + plastic (feeders, perches, dropping trays) + steel (drinkers).

**Features:** Sturdy cages made with electro-galvanised 2.5mm net, raised from the floor, formed by two levels. The fattening cage is equipped with three pens in the upper part and three in the lower part, six feeders, six drip drinkers (to be connected to a gravity water system), two removable plastic perches, six plastic trays to collect the droppings which assure maximum hygiene and cleaning.

The space of every pen (fattening) has an extra-large size compared to the standard model, allowing hosting 2 or 3 rabbits per pen during the first 2 or 3 months of life, thus streamlining the relevant space.

The space of every pen is internally delimited and can be adjusted according to the specific needs, the door can be fully opened from the top and individually from the front.

**Ideal solution to breed rabbits.**

It is supplied disassembled in a box.

**Cage dimensions/each:** 122,5 x 51,5 (60) x 172 cm

# TRAPS AND EXTERMINATORS

# ORMITAL

## UFOTRAP Multi-purpose trap

Multipurpose and ecological chromotropic trap to protect orchards, olive groves, apiaries, and gardens. Ideal solution for trap flies, wasps, hornets, fruit flies, mosquitoes, It is ecological and effective, very easy to assemble and can be used with any plastic bottle. Can be use with food baits\* (e.g. beer, fruit flies + vinegar/ammonia, wine, sardines, ripe fruit...), and hang it directly on trees and plants at a height of about 150 cm.

Very easy to clean and reusable.

**Use:** Outdoors.

## UFOFLY Multi-purpose trap

Universal and ecological chromotropic trap for the protection of orchards, olive groves, apiaries, and gardens. Ideal for trapping flies, wasps, hornets, fruit flies, mosquitoes, insects, etc... Ecological and effective. Very easy to assemble, it adapts depending on the model to any glass jar (e.g. canning jars) or a plastic bottle; can be used with food baits\* (e.g. beer, water + vinegar/ammonia, wine, sardines, ripe fruit), and hang directly on trees and plants at a height of about 150cm.

Very easy to clean, reusable and economical.

**Use:** Outdoors.

## INSTRUCTIONS FOR USE UFOTRAP & UFOFLY

**Use:** Outdoors.

**Period of use:** Early spring to late fall.

**Positioning:** Place 1 trap for each fruit tree (modest foliage cover), at a height of about 150 cm from the ground.

**Exposure:** South facing, if possible.

**Baits:** Use food baits (see recipe booklet\* with recommended baits according to the insect to be treated). Fill approximately 2/3 of the container.

**Monitoring:** Control every 15 days; replenish and/or refill contents, if necessary.

### ⚠ ATTENTION:

It is advisable to mix the food baits in proportions of 2/3 of the capacity of the container and change them in case of particularly harsh weather conditions (e.g. heavy rains, high temperatures...). The ingredients must be dissolved in 500 ml of liquids and the quantities are merely indicative, as they are subject to conditions. The specified dosages are expressed in ml for liquids and in gr for solid foods.

### \* Recipe book

## GHIBLI Dryer

The dryer par excellence! It replaces the sun to dry mushrooms, fruits, vegetables, pasta and any other food without being conditioned by the weather.

The heating system (two resistors of 500W each) and the air circulation (an efficient fan allows a perfect circulation of the hot air in all the trays) eliminates the water of the food, drying it in an optimal and long-lasting way, keeping all their properties intact. The five large trays allow large quantities of product to be dried, making this machine an indispensable appliance for those who want healthy food.

**Healthy food the traditional way!**

**Voltage supply:** 220/230V

**Consumption:** 550/1100W

**Capacity:** kg 1,7/2,5/3,75

**Approximate capacity of each tray:** 750 gr of fruit, 350/500 gr of vegetables.

## Grid to protect the lawn

**Material:** Non-toxic and recyclable technopolymer.

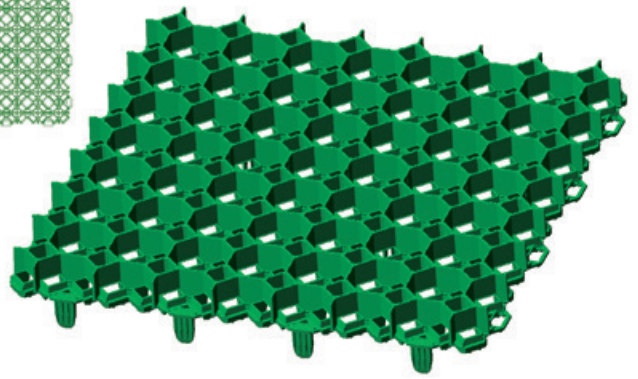

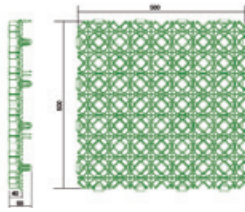

**Characteristics:**

- Honeycomb structure.
- Modular units
- Compressive strength equal to 580 KN.

**Usage:**

- Parking lots, lawns, golf courses....

**Dimensions:** 50 x 50 cm

Article		 l x p x h	 Kg	 Code
<b>GR10</b>	GREEN		1,10	8010213975042
<b>GR10N</b>	BLACK		1,10	8910214000668

## Place holder

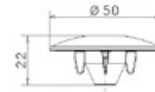

**Material:** Non-toxic plastic.

**Characteristics:** Position marker for parking lots, paths, cultivated areas.

Attachment to the lawn protection grid by means of a stainless steel screw.

**Dimensions:** Diameter 50 x 22 mm

Article		 l x p x h	 Kg	 Code
<b>GR11G</b>	12		0,0013	8010213975059

## Lawn protection grid - Uses

Paved accesses and parking lots.

Roads within the golf courses.

Embankment stabilization.

### Advantages

- PROTECTS THE ENVIRONMENT by ensuring a 90% coverage of the lawn surfaces.
- MAINTAINS MOISTURE in the soil and allows excellent drainage.
- EASY AND QUICK INSTALLATION thanks to the pressure joining system (40/45 m2/hour).

The thickness of the load-bearing layer varies according to the different load stresses and soil conditions, as shown in the table.

The load-bearing layer must be pre-installed as a base for the GRASS PROTECTION GRILL to allow the distribution and transfer of moving loads to the underlying soil. In general, the bearing layer is composed of a mixture of gravel with a grain size of 0/32 mm, on top of which is a layer of crushed stone or, of recycled material at 0/45 mm. In a load-bearing base with anti-icing function, the first layer is usually at least 20 cm thick and the second at least 15 cm. Depending on availability, a single material with a different granulometry can be used, fertilized with long-acting fertilizer.

### Installation bed

The installation bed consists of a mixture of sand and gravel (0/5 - 0/11 mm), permeable to water and stable to favor rooting.

We recommend that you use:

- In case of sub-zero temperatures, a crushed stone mixture.
- In case of dry or sandy soils, lava alone, which has the ability to retain water.

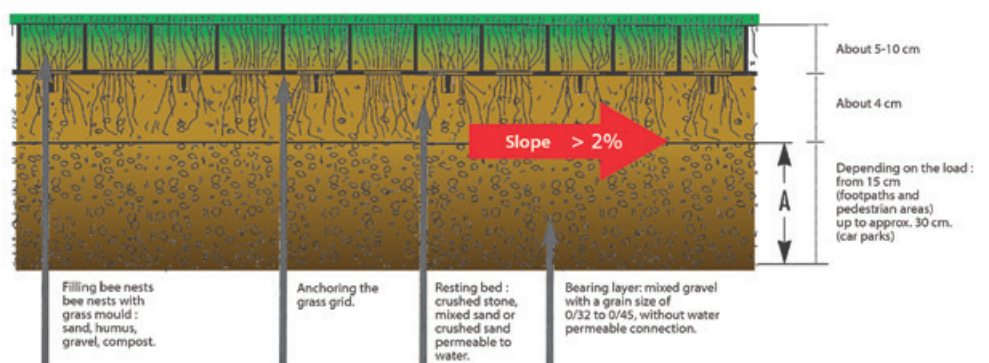

After rolling, the extended and leveled layer should have a thickness of approximately 4 cm; to facilitate rooting, it can be fertilized with organic products.

Fill the combs with mulch, sand, humus, gravel, compost,

Fixing of the grid to preserve the lawn.

Substrate bedding: gravel, fine sand or permeable crushed sand.

Gravel bearing layer with grain sizes from 0/32 to 0/45, non-connected and water permeable.
